### DETAILED ACTION

This Office action is in response to the amendment filed February 26, 2004 in which claims 1-24 were canceled and claims 25-78 were added. It should be noted that no Terminal Disclaimer has been filed in this application.

#### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 25-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 44-97 of copending Application No. 10/084236.

3. Claims 25-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 37-90 of copending Application No. 10/084579.

Art Unit: 1714

4. Claims 25-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 29-82 of copending Application No. 10/084601.
5. Claims 25-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 25-78 of copending Application No. 10/084833.
6. Claims 25-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 28-81 of copending Application No. 10/084237.
7. Claims 25-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 39-92 of copending Application No. 10/084831.
8. Although the conflicting claims of the present invention and those of the copending applications are not identical, they are not patentably distinct from each other because the recitation of a fossil fuel additive encompasses the resid, gasoline, 2-cycle, and diesel fuel additives of the copending applications.
9. These are provisional obviousness-type double patenting rejections because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 112***

10. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 1714

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

11. Claims 32, 38, 49, 55, 59, 66, 76 and their dependents are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original filed specification and claims, claim 10 for instance, do not support benzene, o-xylene, m-xylene, p-xylene, cyclohexane, hexane, octanes, nonane, 2-cycle oil, gasoline and resid fuel as a diluent for the additive composition. The specification teaches that these compounds are used as solvents.

12. Claims 28, 45, 46, 51, 55, 56, 61, 62, 65, 70, 72, 73, 78 and their dependents are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 28, 45, 55 and 72 are rejected because it is not clear how the vegetable oil and nut oil thermal stabilizers differ from the plant oil extract derived from grain. Vegetables and nuts are also grains.

Claims 46 and 51 are substantial duplicates.

In claims 52, 62 and 70, "addition" should read -- additive --.

Claims 56 and 61 are substantial duplicates.

Claims 73 and 78 are substantial duplicates.

***Claim Rejections - 35 USC § 102***

13. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

14. Claims 34, 37-40, 62 and 65-69 are rejected under 35 U.S.C. 102(b) as being anticipated by Jordan (US 5,826,369).

Jordan teaches a carbonaceous fuel composition comprising a fuel additive of beta-carotene (carotenoid), chlorophyll (hydrophobic plant extract), ethoxylated castor oil (thermal stabilizer) and cetane improvers (see abstract; col. 2, lines 11-22). The carbonaceous fuel includes gasoline, diesel fuel, heavy fuel oil (resid), etc. (see col. 2, lines 23-43). The fuel additive may be diluted with a solvent such as gasoline, toluene, diesel fuel and alcohols (see col. 2, line 60 through col. 3, lines 1-6). Jordan teaches that the ethoxylated castor oil provides enhanced combustion characteristics and reductions in pollutant emissions.

Accordingly, Jordan teaching all the limitations of the claims anticipates the claims

15. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1714

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cephia D. Toomer whose telephone number is 571-272-1126. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
